SOLUTION

4 Zones, One Solution. **Safety Never Compromised**

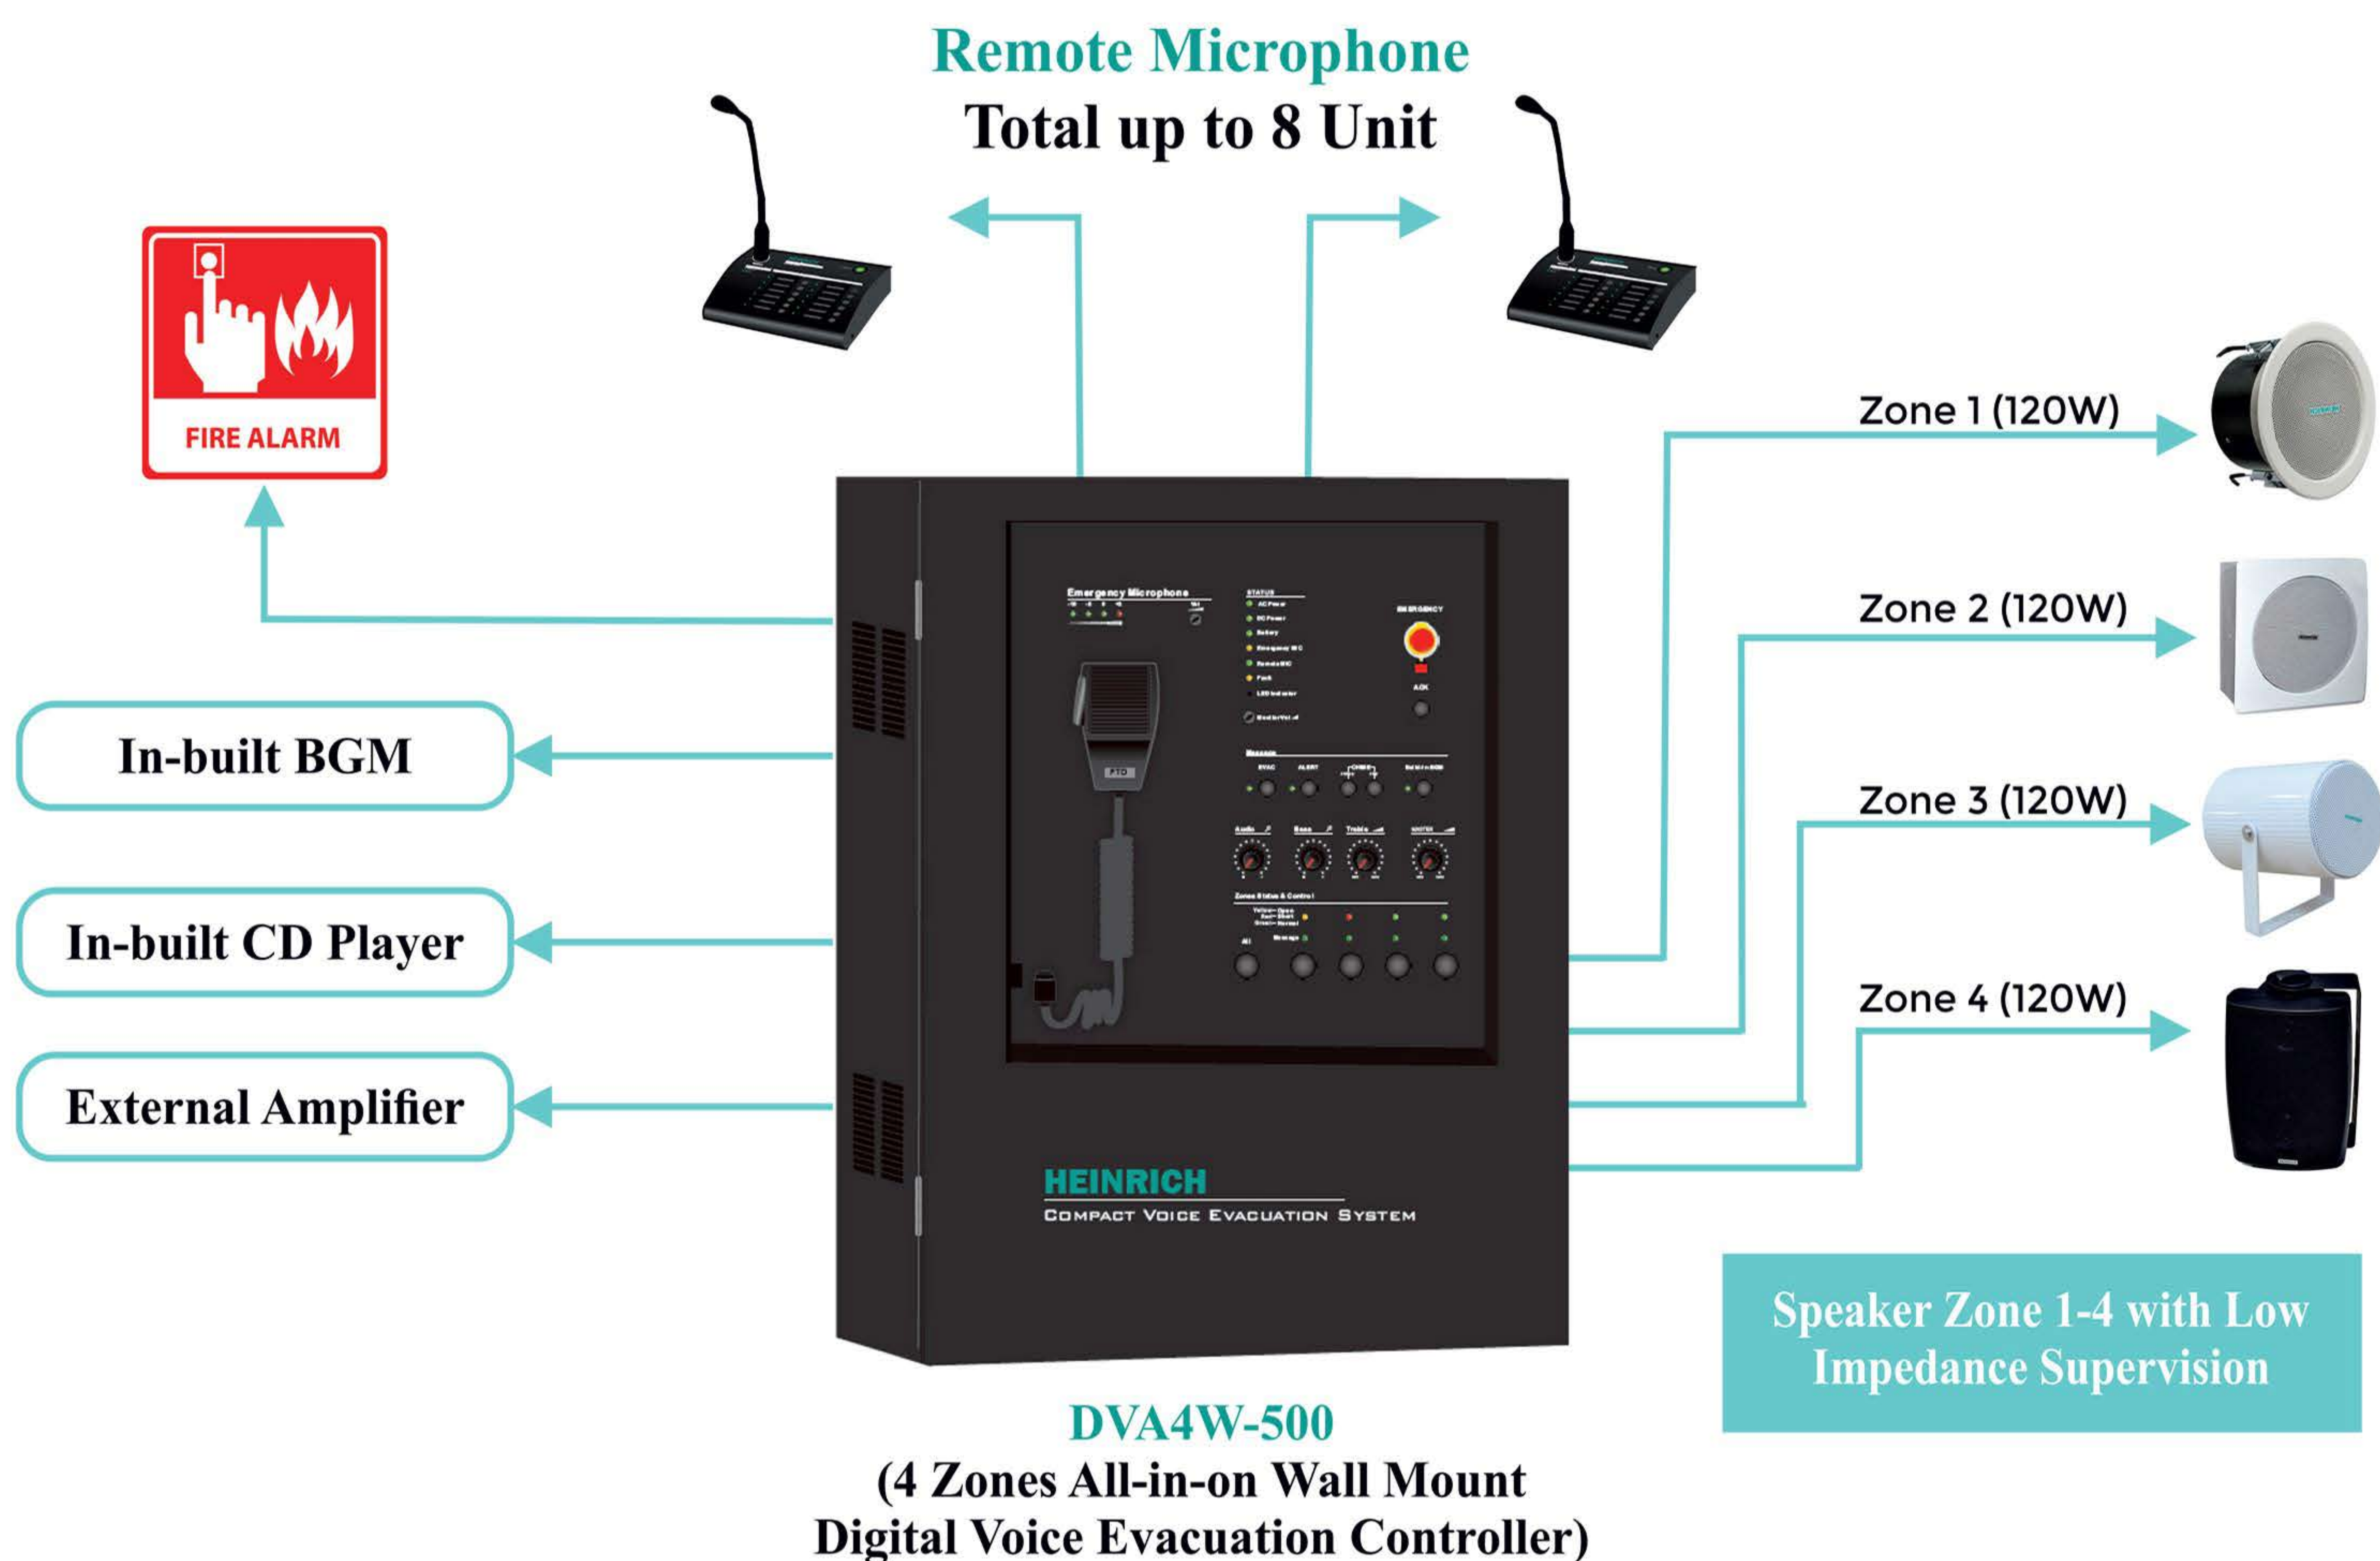

Unveiling Heinrich's 4 Zone PA/VA System

Simplify Your Space, Amplify Your Voice

The All-in-One PA System That Speaks Volumes

In today's complex buildings, managing communication effectively can be a challenge. Here's where Heinrich's innovative 4-Zone All-in-One PA/VA (Public Address/Voice Evacuation) System comes in. This powerful solution simplifies communication while ensuring crystal-clear audio across four designated zones.

> A Multi-Zone Marvel

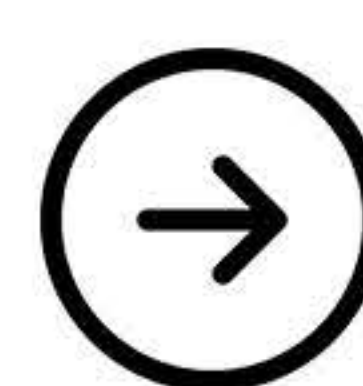

Imagine a large office building with distinct departments. With a traditional PA system, announcements would blanket the entire building, potentially disrupting ongoing activities. Heinrich's 4-Zone system eliminates this issue. It allows for:

Targeted Communication: Deliver announcements/BGM to specific zones. Broadcast a message to the separate zones without interrupting ongoing meetings in finance.

Enhanced Privacy: Confidential announcements can be directed to designated areas, ensuring privacy for other occupants.

Improved Efficiency: Streamline operations by making announcements relevant to specific zones.

> All-in-One Convenience for Seamless Integration

Heinrich's 4-Zone PA/VA system is a complete package. It integrates:

- > **Amplifier:** Provides the 120W power to drive multiple speakers in each zone.
- > **Separate Zone Controllers:** Route audio signals to designated zones.
- > **Hand-Hold Microphones:** Enable clear voice communication for announcements.

This all-in-one design offers several advantages:

- > **Expandability:** It can expand upto 32 zones.
- > **Simplified Installation:** Reduces installation time and complexity.
- > **Cost-Effective:** Eliminates the need for purchasing separate rack & components.
- > **Space-Saving Design:** The compact unit minimizes space requirements.

> The Perfect Fit for Diverse Applications

This versatile system is perfect for various environments, including:

Schools

Isolate announcements for different age groups or specific buildings within a school complex.

Corporates

Deliver targeted messages to departments or common areas.

Hospitals

Maintain patient privacy with zone-specific announcements, while ensuring critical information reaches staff in designated areas..

Malls/Retail Stores

Broadcast targeted promotions or safety messages in specific zones.

> Safety at the Forefront

Heinrich prioritizes safety. Their 4-Zone system seamlessly integrates with voice evacuation functionalities, adhering to the latest life-safety codes. **During an emergency, clear pre-recorded messages can be directed to specific zones, guiding occupants towards designated exits efficiently.**

The Heinrich Advantage: Communication Redefined

› **Unmatched Flexibility:** The 4-zone functionality caters to the diverse needs of complex buildings.

› **All-in-One Convenience:** Simplifies installation, operation, and maintenance.

› **Crystal-Clear Audio:** Ensures effective communication across all zones.

By choosing **Heinrich's 4-Zone PA/VA system**, you gain a powerful communication tool that keeps everyone informed, safe, and productive.
